Montreal

Professional Summary

Senior Software Engineer with 18+ years of experience in delivering high-complexity systems and distributed processing. Built a robust career at global industry leaders, including an 8-year tenure at Capgemini and over 6 years as a consultant at Avenue Code, where I currently drive engineering excellence for Tier-1 clients like eBay.

Proven expertise in mission-critical and high-availability systems, transforming massive data volumes into resilient business solutions. Solid experience in architectural best practices, CI/CD pipelines, and AI-driven development. I leverage AI daily to accelerate engineering, experimentation, and delivery while improving speed, quality, and developer productivity.

Currently based in Montreal. In addition to being fluent in English, I am actively improving my French and hold a B2 Proficiency Certificate (Speaking and Listening) from a 10-month immersion program at the YMCA International Language School.

| WORKING EXPERIENCES

Avenue Code - Canada

Senior Software Engineer (Consultant for eBay)

Aug 2022 – Present | Montreal / QC Canada

Aug 2019 – 2022 | Belo Horizonte / MG Brazil

Continuous 6-year tenure at eBay

Role & Leadership:

Act as a Lead Technology Consultant, driving architectural decisions and high-impact solutions for eBay's SEO and process planning ecosystems.

- **Technical Leadership:** Led the migration of legacy projects to modern tech stacks, taking full responsibility for proposing scalable architectures and overseeing end-to-end implementation.
- **Innovation:** Integrated AI-driven workflows and LLMs to accelerate experimentation and engineering productivity.
- **Talent Acquisition & Mentoring:** Responsible for conducting technical interviews for eBay's candidate pipeline. Developed and optimized a custom interview process that significantly improved hiring efficiency, resulting in multiple successful placements of high-performing engineers.

Project Highlights (SEO / AEO Core Services):

Leading the engineering of high-performance tools to enhance search engine visibility. Key contributions include optimizing URL indexing, page customization frameworks, and specialized internal tools designed to streamline SEO workflows and LLM citation strategies across the organization.

- Architected and optimized eBay's mission-critical canonical URL infrastructure and distributed systems, processing massive data volumes to ensure high availability and global search visibility for millions of products.

Technology Stack:

- Backend & AI: Java, Spring, Spring Boot, Spring Batch, Spring AI.
- Data & Big Data: GCP, GCP Pub/Sub, Hadoop, Hive, Spark, SparkSQL, pySpark, Apache Flink, Apache AirFlow.
- Testing & Quality: Automated Testing, Component Testing, Integration Testing and Contract Testing.
- Database & Messaging: MySQL, Oracle, MongoDB, NoSQL (eBay NoSqlDB), Kafka.
- Ops & Strategy: Scrum, CI/CD Pipelines, Jenkins, Git Actions, Infrastructure Migration, Technical Architecture.
- AI-fluent, leveraging Claude, Copilot and Cline to accelerate architecture and delivery without compromising technical excellence.

Capgemini Brasil S/A

(Aug 2013 – Aug 2019) Belo Horizonte / Brazil

I System Analyst Senior

Role Description: Designed and developed JavaFX desktop solutions and REST APIs (Jersey) with automated update agents for streamlined software delivery. Implemented cloud-based monitoring via Firebase Functions and engineered Python-based IoT integrations for RFID and SmartCard (HID) systems.

Technology Stack: Java, JavaFx, Python, Raspberry, EJB, Oracle DB, SOAP, REST, Maven, Jenkins.

Cast Informática S/A

(Aug 2012 – Aug 2013) Belo Horizonte / Brazil

I Senior Java Developer

Role Description: Development of applications for the Health Ministry.

Technology Stack: Java, Swing, EJB, Oracle DB, Spring

Capgemini Brasil S/A (Former CPM Braxis)

(Aug 2008 – Aug 2012) Belo Horizonte / Brazil

I System Analyst

Role Description: Development of management applications for “Oi telecom”, using Java, C#, Php.

Technology Stack: Java, PHP, C#, C++, Delphi, Richfaces, SVN
